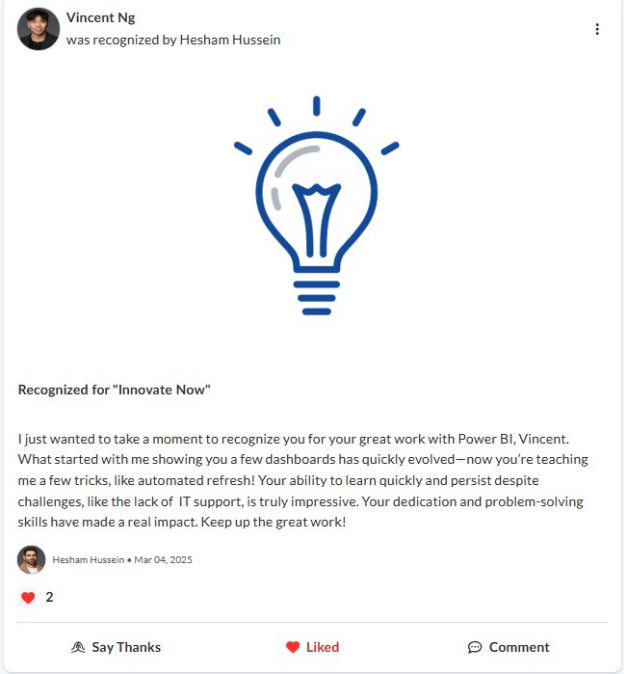
# Peer Recognitions & Testimonials

Throughout my time at General Motors of Canada, I received multiple peer recognitions for innovation, collaboration, and technical excellence. Below are selected recognitions from colleagues across the organization, highlighting contributions in Power BI development, AI tool creation, and knowledge sharing.

## Recognition from Hesham Hussein

March 4, 2025 · Recognized for "Innovate Now"



*Hesham recognized Vincent's rapid growth with Power BI — evolving from learning dashboards to teaching automation techniques like automated refresh, and persisting through IT challenges.*

*This portfolio contains screenshots for demonstration purposes only. All numerical data is confidential and proprietary to General Motors of Canada.*

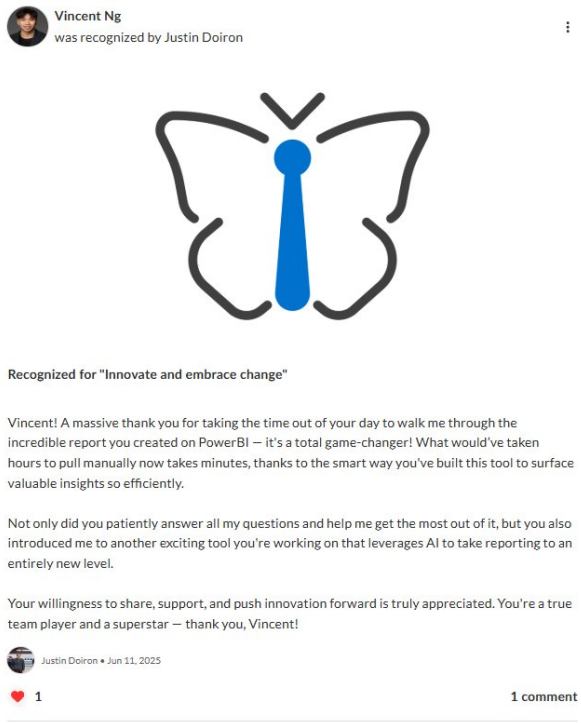
## Recognition from Justin Doiron

June 11, 2025 · Recognized for "Innovate and embrace change"



Vincent Ng
was recognized by Justin Doiron

**Recognized for "Innovate and embrace change"**

Vincent! A massive thank you for taking the time out of your day to walk me through the incredible report you created on PowerBI — it's a total game-changer! What would've taken hours to pull manually now takes minutes, thanks to the smart way you've built this tool to surface valuable insights so efficiently.

Not only did you patiently answer all my questions and help me get the most out of it, but you also introduced me to another exciting tool you're working on that leverages AI to take reporting to an entirely new level.

Your willingness to share, support, and push innovation forward is truly appreciated. You're a true team player and a superstar — thank you, Vincent!

Justin Doiron • Jun 11, 2025

1 1 comment

*Justin highlighted the Power BI report Vincent built as a total game-changer — replacing hours of manual data pulls with minutes of interactive insights. He also praised Vincent for introducing him to a new AI-powered reporting tool under development.*

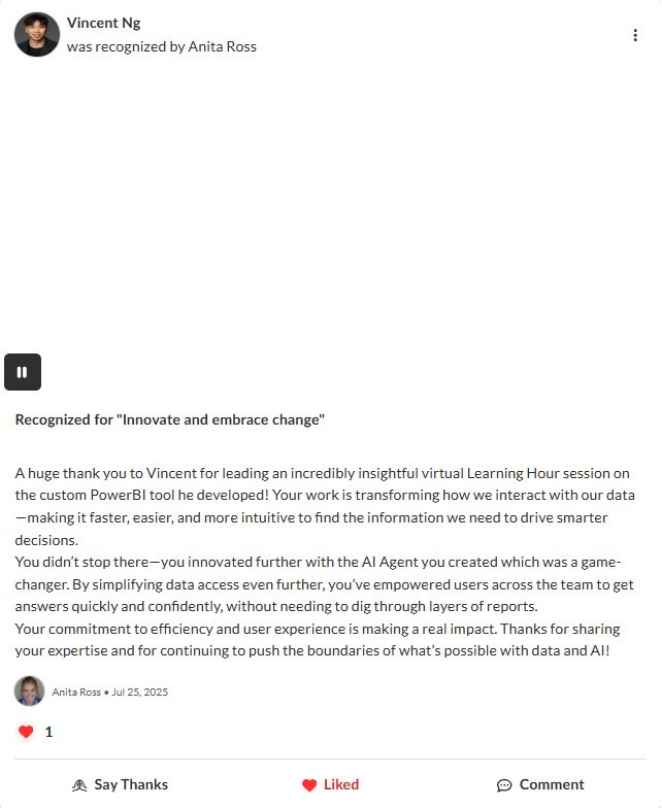
# Peer Recognitions (continued)

## Recognition from Anita Ross

July 25, 2025 · Recognized for "Innovate and embrace change"



*Anita praised Vincent's virtual Learning Hour session on his custom Power BI tool and the AI Agent he built — calling it a game-changer for empowering users to access data quickly and confidently.*

*This portfolio contains screenshots for demonstration purposes only. All numerical data is confidential and proprietary to General Motors of Canada.*

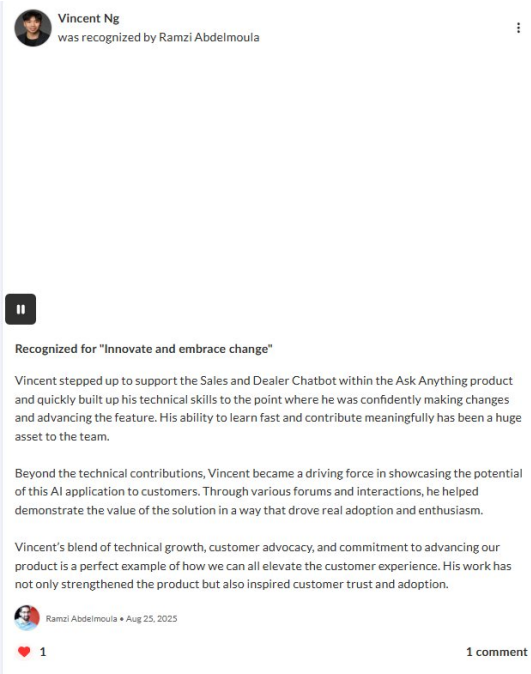
## Recognition from Ramzi Abdelmoula

August 25, 2025 · Recognized for "Innovate and embrace change"



**Vincent Ng**
was recognized by Ramzi Abdelmoula

**Recognized for "Innovate and embrace change"**

Vincent stepped up to support the Sales and Dealer Chatbot within the Ask Anything product and quickly built up his technical skills to the point where he was confidently making changes and advancing the feature. His ability to learn fast and contribute meaningfully has been a huge asset to the team.

Beyond the technical contributions, Vincent became a driving force in showcasing the potential of this AI application to customers. Through various forums and interactions, he helped demonstrate the value of the solution in a way that drove real adoption and enthusiasm.

Vincent's blend of technical growth, customer advocacy, and commitment to advancing our product is a perfect example of how we can all elevate the customer experience. His work has not only strengthened the product but also inspired customer trust and adoption.

Ramzi Abdelmoula • Aug 25, 2025

## Recognition from Dave Canella

August 26, 2025

Most recent

**Dave Canella**
Aug 26, 2025

Thank you, Vincent, for all your support for AI at GM Canada, including showcasing our capabilities to others in the organization. I am very grateful for all your contributions to this rapidly growing space!

*Dave thanked Vincent for his support of AI initiatives at GM Canada, including showcasing capabilities and contributing to the organization's rapidly growing AI space.*

## Key Themes Across Recognitions

### Innovation & AI Leadership
Built the Ask Anything AI tool using Databricks, SQL, and LLMs — deployed GM-wide with <25s response time

### Power BI Excellence
Developed 6+ automated dashboards replacing 2-hour Cognos exports with instant, live-refresh reporting

### Process Optimization
Automated the RPM data-input workflow, reducing a 1.5-hour manual process to 5 minutes

### Knowledge Sharing
Led Learning Hour sessions with 200+ attendees, educating VSSM org on Power BI and dashboard automation

### Technical Growth
Self-taught Power BI, DAX, SQL, and Databricks — rapidly evolved from basics to advanced AI integration

### Customer Advocacy
Showcased AI solutions at the GM Canada AI Centre Launch Event, driving real adoption and trust

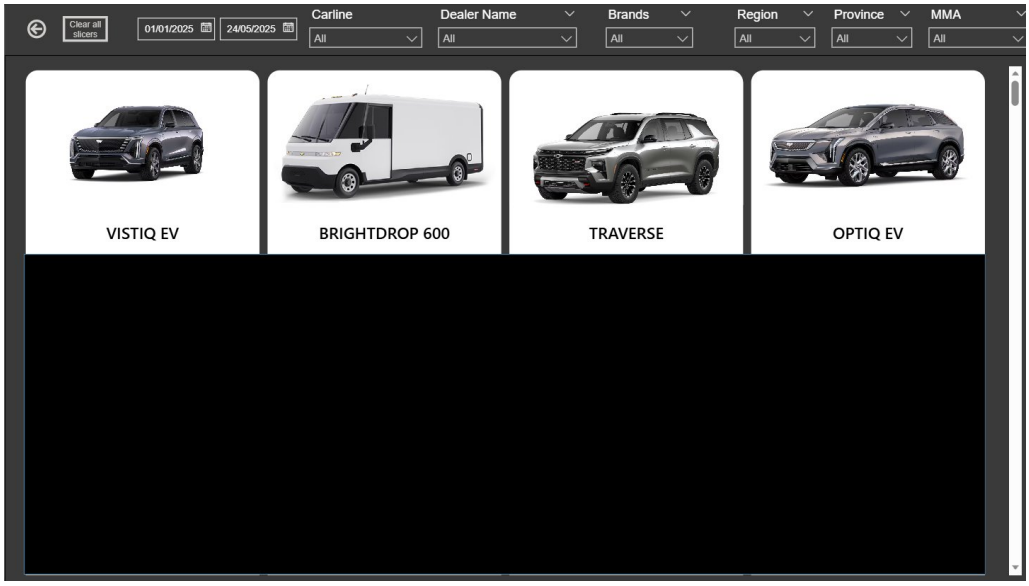
*This portfolio contains screenshots for demonstration purposes only. All numerical data is confidential and proprietary to General Motors of Canada.*

# Dashboard & Tool Showcase

The following pages showcase Power BI dashboards and analytics tools I built at GM Canada. These tools enabled real-time visibility into vehicle sales, inventory, and dealer performance across the country. All data has been obscured to protect confidential information.

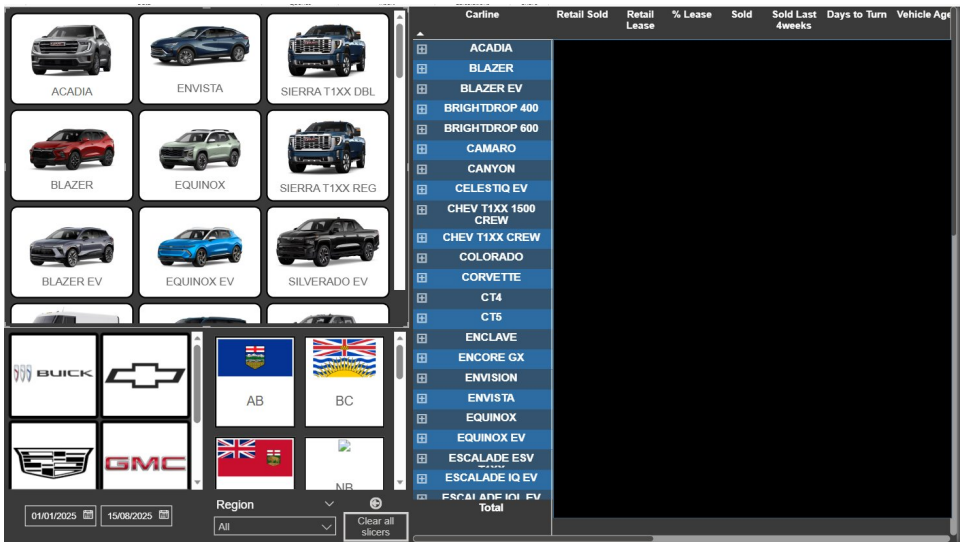
## Vehicle Model Performance Cards

Interactive card view showing sales, inventory, and turn metrics per vehicle model



## Carline Sales & Inventory Matrix

Full carline view with vehicle imagery, brand/province/region filters, and performance metrics

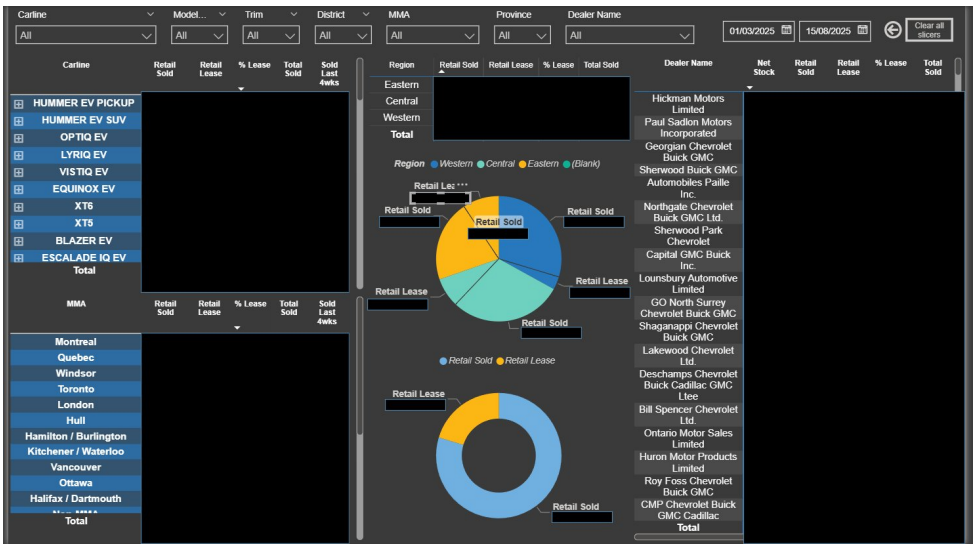


*This portfolio contains screenshots for demonstration purposes only. All numerical data is confidential and proprietary to General Motors of Canada.*

# Dashboard Showcase (continued)

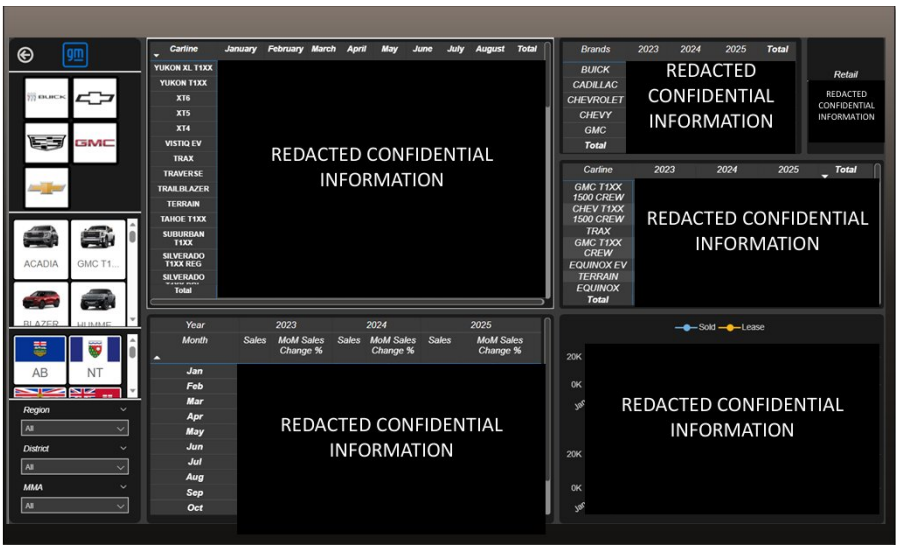
## Retail Sales & Lease Analysis

Regional lease penetration with dealer-level performance tracking and pie chart breakdowns



## Sales Performance & Trends Dashboard

Monthly sales tracking by carline and brand with year-over-year comparison and trend charts



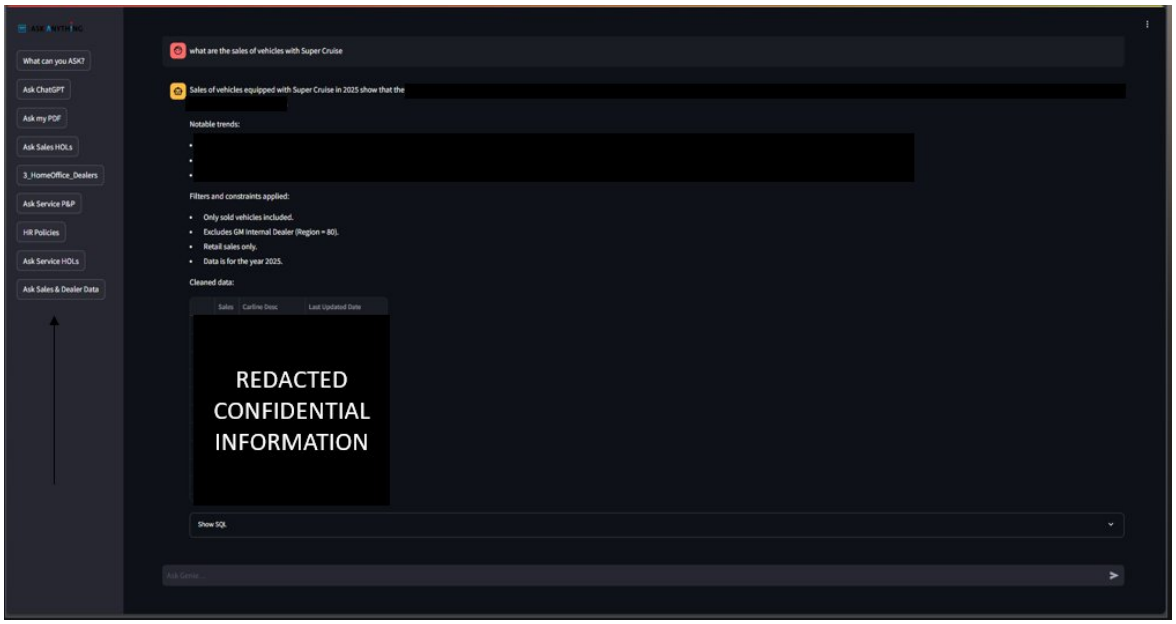
*This portfolio contains screenshots for demonstration purposes only. All numerical data is confidential and proprietary to General Motors of Canada.*

# Ask Anything AI — Conversational Data Tool

Ask Anything AI is a natural-language data query tool built on Databricks with SQL logic and LLM layers. It enables non-technical users across GM Canada to ask plain-English questions about sales, inventory, and dealer data — and receive instant, accurate answers without writing SQL. Vincent self-taught SQL and Databricks to build this tool, collaborated with the Head of AI Strategy (Ramzi Abdelmoula) and Max Chen, and presented a live demo at the GM Canada AI Centre Launch Event. The tool was rolled out GM-wide with a response time under 25 seconds.

## Ask Anything AI — Sales & Dealer Data Interface

Natural-language query interface with multiple data endpoints including Sales HOLs, Dealer data, and HR Policies

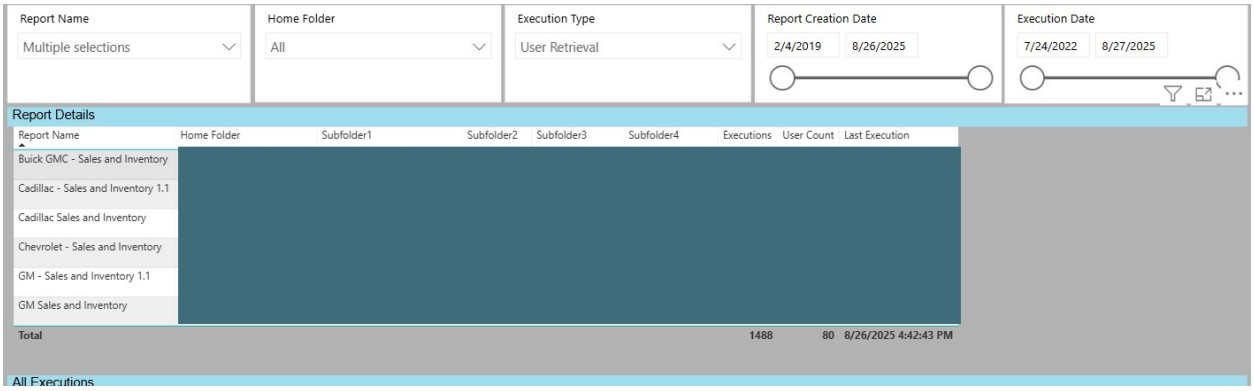


*This portfolio contains screenshots for demonstration purposes only. All numerical data is confidential and proprietary to General Motors of Canada.*

# Impact & Adoption

## Report Usage & Adoption Metrics

Tracking dashboard adoption across GM Canada teams — 1,488 total executions, 80 active users



*The report usage dashboard tracks execution frequency, user counts, and adoption trends across all Sales & Inventory reports built for GM Canada brand teams including Chevrolet, Buick GMC, Cadillac, and the consolidated GM view.*

*This portfolio contains screenshots for demonstration purposes only. All numerical data is confidential and proprietary to General Motors of Canada.*

# Summary of Contributions

## Co-op Term: September 2024 — September 2025

Chevrolet Marketing Co-op & Data Science Intern | General Motors of Canada

- Designed and deployed 6+ Power BI dashboards serving 80+ users across GM Canada, covering Chevrolet, Buick GMC, Cadillac, and a consolidated GM-wide view.
- Built Ask Anything AI — a Databricks-powered natural-language query tool using SQL logic and LLM layers, enabling non-technical users to get instant data answers. Rolled out GM-wide with under 25-second response time.
- Automated the RPM data-input workflow by building Excel templates with direct-source formulas, reducing a ~1.5-hour manual process per MSM down to 5 minutes of copy-and-paste.
- Replaced ~2-hour Cognos data pull and Excel formatting processes with instant, live-refresh Power BI dashboards — introducing a standardized format across brand teams and leadership.
- Led a Learning Hour on Power BI and Dashboard Automation with 200+ attendees across the VSSM organization, and hosted a second session in collaboration with Anita Ross.
- Presented a live demo of Ask Anything AI at the GM Canada AI Centre Launch Event, showcasing AI capabilities and driving adoption across the organization.
- Received 5 formal peer recognitions for innovation, rapid technical growth, cross-functional collaboration, and AI leadership from colleagues including the Head of AI Strategy.
- Self-taught Power BI, DAX, SQL, Databricks, and prompt engineering over the course of the co-op term, applying each skill to solve real business problems.
